

LET'S PRESERVE THE ENVIRONMENT

GLOBAL WARMING

The Earth is getting hotter. It's harder for animals to find the food and water that they need.

CAUSES

- The generation of energy
- The use of transport.
- The excessive consumption

CONSEQUENCES

- Increase in temperatures
- Stronger in storm
- More healthy risks

SOLUTIONS

- Drive less
- Recycle more
- Avoid packaging

Pollution

The earth, rivers, and seas are polluted by chemicals and rubbish. Animals with diseases and die.

CAUSES

- Incorrect use of pesticides.
- Uncontrolled waste dumping
- Industrial debris

CONSEQUENCES

- Air pollution can increase the risk of respiratory infections.

Solutions

- Use public transport
- Buy local products
- Recycle.

DEFORESTATION

Animals lose their homes when people cut down forests to build farms or roads. They also lose their source of water.

CAUSES

- Pet trade
- Obtaining meat

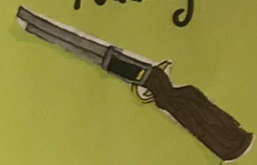

CONSEQUENCES

- Alteration of the water cycle.
- Desertification
- Loss of habitat
- Modification of the global climate.

SOLUTIONS

- Plant a tree

Hunting and Poaching

People hunt and poach wild animals for their skins, horns or tusks, or to sell them as exotic pets.

CAUSES

- Pet trade.
- Obtaining meat.

CONSEQUENCES

- Habitat destruction.
- Animals feel very threatened.
- Danger of extinction for many animals.

Solutions

- Prohibit the sale.
- Stop buying products made with species that are in danger of extinction
